

## Home Learning - Tuesday 12<sup>th</sup> January

Good morning,

Apologies for the technical issues with Tapestry yesterday, Mrs Hinds and I were doing our very best to log on but unfortunately this was not successful. Once again, I have emailed Tapestry for some reassurance that this will not continue to happen. However, should access be difficult again, as I know this was the case for parents too, the home learning will be sent to the office, so that it can be sent out as a parentmail.

We hope that you were still able to complete the activities that were set and had a fun day of learning!

Here are today's activities:

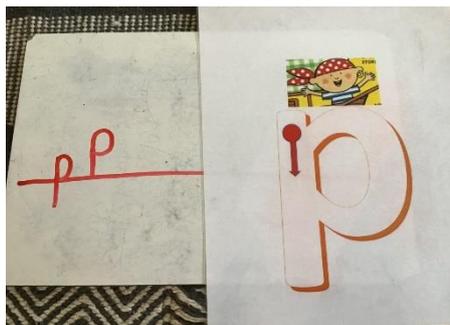

**Phonics** - Please listen to the story Pirate Pete.

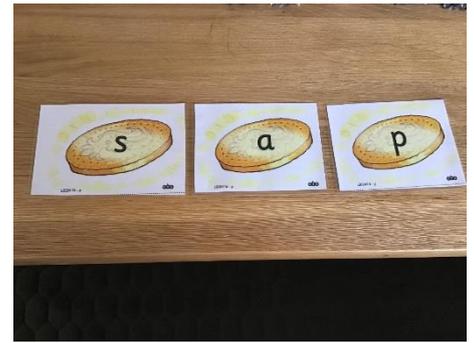

<https://www.youtube.com/watch?v=y4pn-LWYZVg>

Practise the sound 'p, p, p Pirate Pete and the caption action 'pretend to pop bubbles with your index fingers and then swing bended arm'. Using a pirate hook finger, if you have one, practise the sparklemark 'p' in some sand, on a piece of paper or on a whiteboard, saying 'walk Pirate Pete down the plank, back up and around the deck'.

Please do this for the lower case and capital letter. Sorting - Look at the pictures of things found in Pirate Pete's treasure box - which ones start with the 'p' sound?

**Reading** - Please sound talk the words that Pirate Pete has created with his coins - you could use phoneme fingers, robot arms or stomping feet to segment and then blend the words together. Discuss what the words mean with your grown up. You could even put them into a sentence and verbalise this, for example 'I pat my dog'.

**Maths** - Guessing game. Can your grown put a handful of objects into a jar/ bowl. Can you guess how many objects are in the jar or bowl. Write your guess down and then check by counting. Swap over - can you put some items in the jar/bowl and ask your grown up to have a guess - make sure they give a sensible answer - ask your grown up to write down their guess and count the items to see if they were correct. Did their guess need to be a bigger number or a smaller number - were there more or less?

**EAD** - Can you make your own treasure chest (for example by using an old box and wrapping it in foil). Can you then add treasure to your box by finding items that start with 'p'. Can you hide your treasure chest in the house and then draw a map to help your grown up find it, don't forget 'x' marks the spot! **Music** - Can you listen to and join in with this fun pirate song - <https://www.youtube.com/watch?v=QVfVIcW1alo>

**UW** - Food Preparation - Pirates needed as much vitamin C and healthy food as possible to prevent them getting poorly with a disease called scurvy. Can you touch, feel and smell different citrus fruits - cut them in half and give them a squeeze. Can you use the fruits and any others you may have to make a tasty drink?

PD - Enjoy a fitness challenge with JumpStart Johnny -
